A PROUD SOUTH AFRICAN COMPANY

# STRUTFAST - cable management solutions

## A CUSTOMER FOCUSED HERITAGE

Established in Johannesburg, South Africa in 2001, STRUTFAST designs, manufactures and supplies cost effective cable management systems for all industries. Our focus is to provide high quality solutions to meet and exceed even the most arduous project requirements.

With an emphasis on innovation & full project lifecycle support, we have the technical design skills, manufacturing capability and logistics expertise to ensure that our customers can complete their projects - on time and within budget.

At STRUTFAST, our experience in value engineering & innovative product design, means that we aim to reduce costs across the entire scope of the client's project.

## QUALITY SYSTEMS, QUALITY PEOPLE, QUALITY PRODUCTS

Absolute quality is at the heart of STRUTFAST and our Business Management System has been developed to meet all of the requirements of ISO 9001:2008, along with extending our compliance into ISO 9001:2015 in the near future.

STRUTFAST is a proud South African company and is committed to the Broad Based Black Economic Empowerment initiative. We are a Level 4 BBEE contributor and have a 51% Black ownership participation scheme (ESOPS), through which STRUTFAST contributes to the business involvement, mutual learning and in house support of previously disadvantaged Black people and our management philosophy supports this.

A PROUD SOUTH AFRICAN COMPANY

## STRUTFAST - cable management solutions

### STEEL CABLE LADDER

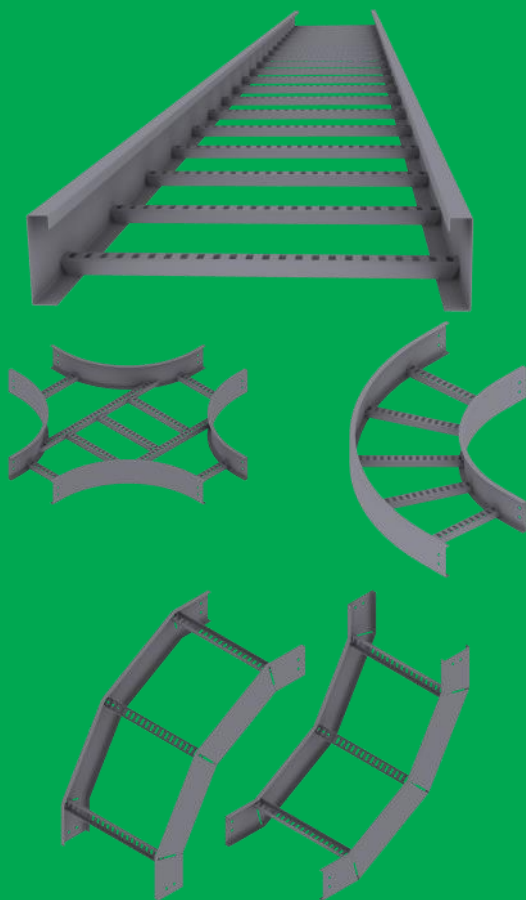

A complete cable support system specifically designed for arduous applications, with a product portfolio based on technical design innovations. With a variety of time saving features that make it quicker, safer and easier to complete the installation, our cable ladder ranges are the ultimate support system. Our cable ladders are designed and independently tested to NEMA 20B and 20C and comply with all relevant international standards & specifications.

### CABLE TRAY

The cable tray range is a cable support system that is easily assembled on site, with products designed to carry electrical cables in both horizontal & vertical applications. Available in a variety of finishes, from pre-galvanised, HDG, stainless steel, GRP and other finishes upon request, in order to meet a wide variety of applications. With a variety of time saving features, all of which are designed to shorten installation times whilst also reducing energy wastage on site, our cable tray systems are suitable for tough industrial applications and are aesthetically pleasing enough for any commercial application.

### METAL FRAMING & SUPPORT SYSTEMS

Our metal framing systems, also known more generally as Unistrut, provide an economical solution for virtually any industrial, mining, petrochemical, infrastructure, commercial or data center application. It is easily installed and gives full flexibility to support systems for any application. Incorporating a comprehensive array of brackets, fittings & accessories, with ongoing innovative product developments, the systems are available in a wide variety of channel profiles, material thicknesses and finishes, giving you the most complete and flexible support system available. HDG, pre galvanised, stainless steel and GRP are just some of the options available for your application.
